

LEVELING & STABILIZATION

An Electric Tongue Jack on the market produced by a competitor looks nearly identical to the LCI Power Tongue Jack (White - 181794, Black 1817941). Customer interactions about the Electric Tongue Jack require verification of the LCI logo on the motor head and the mount plate shape.

1. The LCI Logo can be embossed in the head cover (Fig.1A), or it can be a sticker placed into a depression in the head cover (Fig. 2). The sticker is removable (Fig. 3). The impostor will have a depressed circle with no LCI logo embossed (Fig 4A), which will look exactly like the LCI jack missing the sticker. See the mounting plate to compare the LCI jack to the impostor jack (Figs. 5 and 6).

LEVELING & STABILIZATION

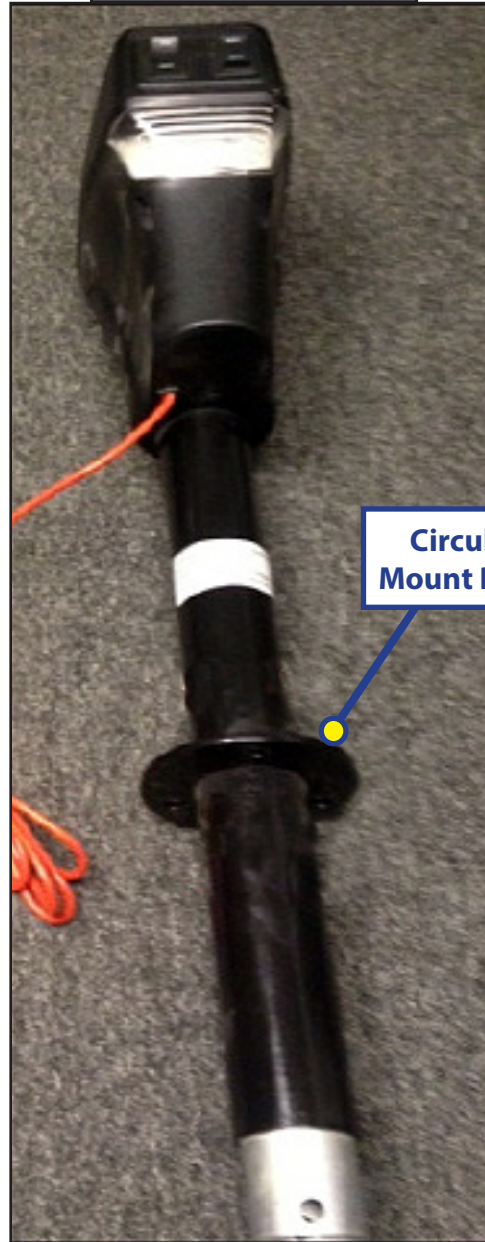

2. Verify mount plate is trapezoidal (Fig. 5). The impostor will have a circular mount plate (Fig. 6).
