

T.I.P. Troubleshooting Information on Power Gear

ELECTRICAL WIRING INFORMATION

The wiring for the slide-out should be completed per the following wiring diagram.

The switch wires, motor wires and ground wire can be connected to the control at any time during installation prior to the power being connected. The battery line must be connected to the control **BEFORE** the battery is connected, but cannot be connected until after the system has been high potted.

NOTE: If motor runs in reverse direction, switch motor leads.

CAUTION: The control box **WILL** be damaged if any of the leads are grounded or touched together when power is connected to the system.
