

## SLIDE-OUTS

Power Unit - 12V DC Motor with Pump and Reservoir

EXTEND ports for the extension of the Full Wall Slide-out System are positioned on the block with the flow divider. The RETRACT ports are positioned on the small square block on the retract side of the pump unit.

Page 6 of the "Hydraulic Full Wall Slide-out System" represents the first version of the stand alone pump unit. This configuration showed the EXTEND and RETRACT ports in the opposite orientation of the pump unit shown above. The configuration above shows the current version of the "Hydraulic Full Wall Slide-out System" pump unit.

As a supplier of components to the RV industry, safety, education and customer satisfaction are our primary concerns. Should you have any questions, please do not hesitate to contact us at (574) 537-8900 or by email at [customerservice@lci1.com](mailto:customerservice@lci1.com). Self-help tips, technical documents, product videos and a training class schedule are available at [www.lci1.com](http://www.lci1.com) or by downloading the MyLCI app.
